GREATER HEAD-START WITH A MARKET LEADER

The Orderman radio ordering system has one major advantage over the competition: it is specially designed for the hospitality industry. And because we are its proud creators, we also set the standards for user-friendliness and flexibility. So we are entitled to describe ourselves as market-leader – and just one look at the restaurant industry will convince you. Often imitated, never matched.

GREATER SUCCESS WITH QUALITY SERVICE

The basic problem in the hospitality industry is of course the same everywhere: Too much pressure, too little time – usually twice a day. For a short time at midday, longer in the evening. And it's the same regardless of the size of the restaurant. That's where Orderman comes in: withMax2 and Max2plus every business outlet can be faster, more efficient and even more welcoming. Whether an ice-cream parlour, bar, coffee shop, tea room, cafe, pub, bistro or restaurant – Max2 enhances mobility, speed, friendliness, competence and profits.

GREATER PROFIT WITH RAPID RESPONSE

Think about it: if just three beers and four coffees are forgotten a day, it can quickly add up to worrying levels of lost income for a small business. Scale that up to the size of your business and the number of covers, and you can easily see the result. And the worst of it is that you don't even notice! So it's good if you have reliable, rapid and dependable help – like the Max2 – on your team.

GREATER SECURITY WITH TECHNOLOGY

With a Max2 you are secure – so you can relax and focus on your guests. After all, the unbeatably-stable radio signals ensure 100% freedom from malfunctions – from the beer garden through the kitchen and to the bar. Hackers also don't have a chance, and the batteries provide guaranteed continuous output for up to 18 hours continuous online operation. In addition: a Max2plus provides first-class communication with all current systems for contactless customer cards (RFID with ISO standard, LEGIC, magnetic cards). And a small tip: Max2plus already has a Bluetooth link to the belt printer installed as standard.

GREATER COMFORT WITH INNOVATION AND DESIGN

Ergonomics and light-weight on the one hand, extreme robustness and legibility in sunlight on the other. In cooperation with a display manufacturer we have specially developed the display in the Max2 to cope with the demands of the hospitality industry, setting a new standard for good business with perfect service.

GREATER HOSPITALITY WITH POWER PRINT

So you don't have to interrupt communicating with your guests, the optional belt printer can issue bills with an individualized logo and design quickly and simply at the table ... up to 1,500 bills with one battery charge.

A SUMMARY OF HIGHLIGHTS

- Large display, easy to read even in sunlight
- Long battery life
- Water-tight special seal for casing, touchpad and battery
- Extremely robust casing with abrasion-resistant polycarbonate-coated surface
- Practical fax function with handwriting recognition for special requirements
- 180° flip view function display
- Auto-lock function: automatic touch lock when vertical, automatic standby switch for display
- Direct ordering via easy-to-customize menucard

GREATER OVERVIEW WITH USER-FRIENDLINESS

The user interface can be individually adjusted to your needs with the help of the menucard. The most popular orders are stored on the touchscreen using the menucard. This enables the majority of dishes or drinks to be ordered with just one touch. At the same time, special requests are no longer any trouble, with the practical and easy-to-use (handwritten input) fax function, and cost no more than a smile from your staff. Much to the delight of your guests.
